Virtual ATS

An effective tool for working
with customer calls

Almaty 2023

The customer calls your company and wants to order a product or service. How can you lose it?

CUSTOMER CALLS AND HEARS «BUSY» OR «STAY ON LINE»
Your employee is talking to the client, at which time the second call is received. Even if there is a free employee sitting next to him, he will not be able to answer this call

THE NUMBER HAS NOT BEEN SAVED AND THE CUSTOMER HAS NOT BEEN CALLED BACK QUICKLY
If you're using a wired phone, you probably won't even know someone called while you're talking and you won't be able to call back

CUSTOMER CALLED NUMBER, BUT NO ANSWER WAS RECEIVED
The manager could have walked away from the workplace, could have been on the way or at a meeting, he could have just lost his phone. Many calls remain unanswered

According to statistics, in Kazakhstan, 50% of calls to the company remain unanswered. These calls are lost money of your company.
WE HAVE A WAY TO FIX THIS!

Virtual ATC

Call processing service, which allows you to get all the capabilities of office ATS, do not miss a single call, monitor the work of employees, connect CRM, take calls to the company on desktop and mobile phones

Our advantages

JUST A CHEAP

No need to buy an office telephone exchange and keep an engineer who will service it

.

БОЛЬШЕ ЧЕМ АТС

All functions of standard ATS, connecting any devices: SIP phones, softphones, mobile phones, PC + a large number of additional functions.

.

MOVING IS NOT A PROBLEM

If you move to a new office, you will not have to re-lay cables and change numbers. Just connect terminals to the Internet and everything will work

.

MULTICHANNEL

Virtual numbers allow you to receive and make calls by several employees at the same time.

YOUR COMPANY IS GROWING

If your staff increases, you will not need to buy expensive equipment, the service is easily expanded.

PERSONAL ACCOUNT

You will have your own page of your Virtual ATS, which is no more difficult to set up than a page in Vkontakte.

EASE

Virtual ATS can be connected and disconnected in minutes, allowing you to use it even for a short period of seasonal sales or promotions.

REMOTE WORK TOOL

Virtual ATS allows you to monitor your employment, remotely coordinate the activities of employees with the help of reports on calls and recordings of conversations.

THE RELEVANCE OF THE FUNCTIONALITY

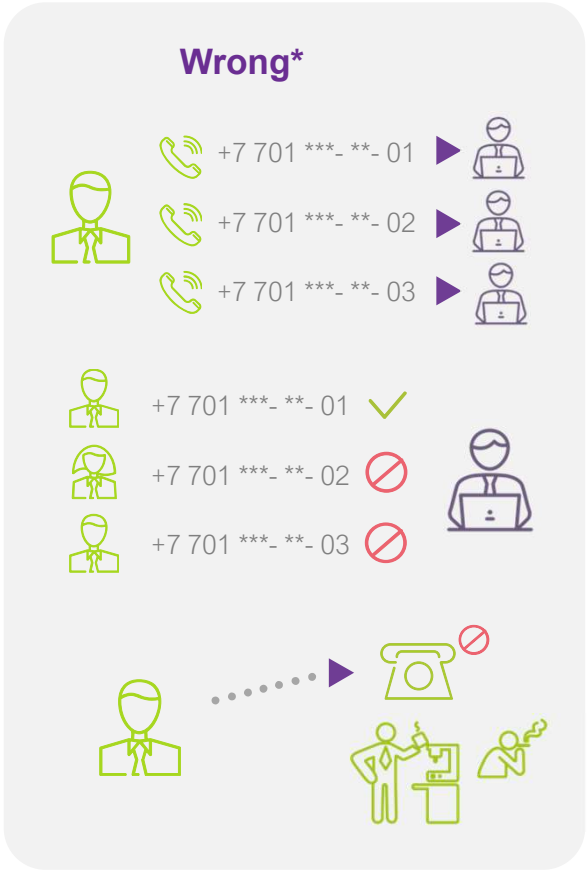

The virtual ATS is regularly updated. Unlike office ATS, it will never become obsolete.

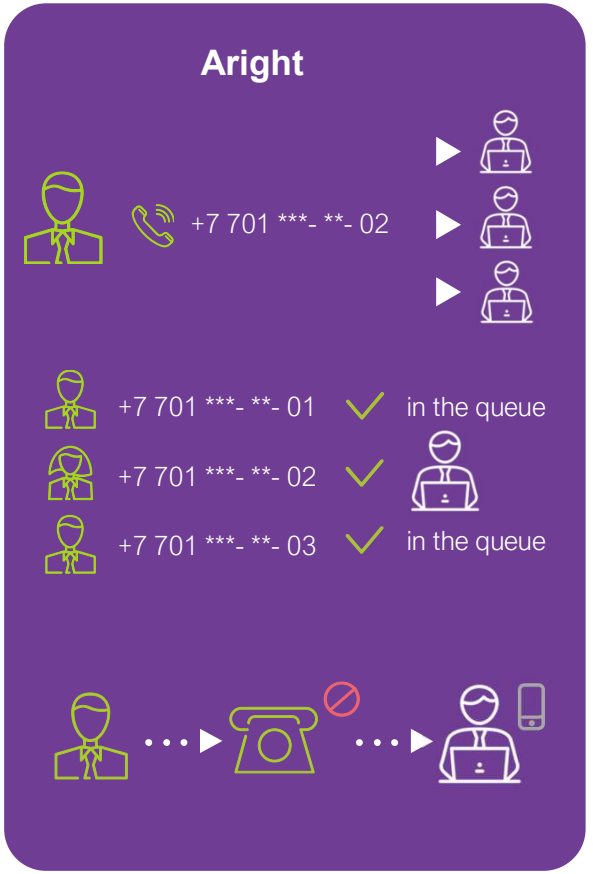

How not to lose calls

Instead of many different numbers
Set a single multi-channel number

If all operators are busy, do not call back
Set the queue for calls

If the employee has departed
Set call forwarding

Kcell

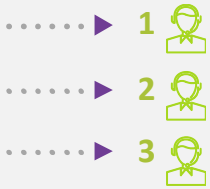

** If you accept calls according to one of the schemes below, then already now you lose calls, and therefore your potential clients*

Get additional clients

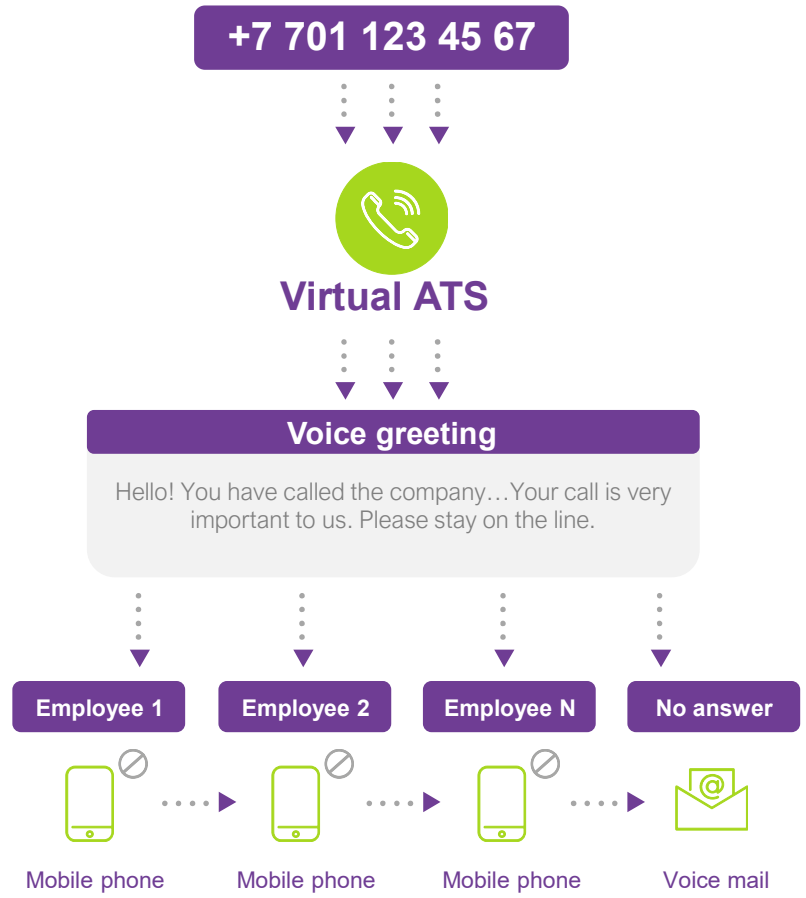

Kcell

Successful application

Advantages for small businesses

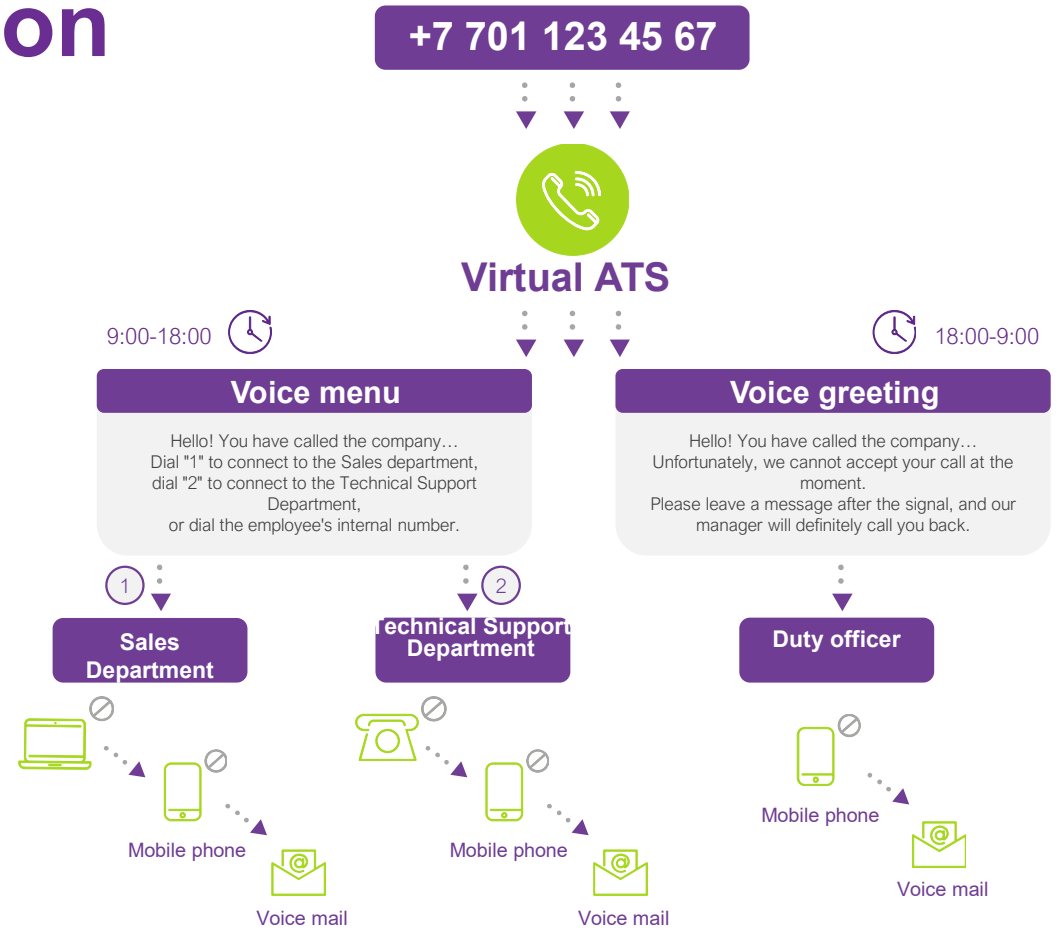

- A single multi-channel dialer number for all customers
- Voice greeting with company information
- There is no binding to the office, all calls come to mobile phones
- The call will be sent to the first available employee, or to voice mail
- An employee who receives a call on a mobile phone can easily redirect the call to another employee

Successful application

Advantages for medium-sized businesses

- Single dial number for all customers
- Calls are allocated according to company's schedule
- Voice menu with department number or internal number of employee
- If the landline does not answer, the call will be redirected to the mobile phone, if not, the call goes to voice mail
- A staff member who starts a call on a landline can either transfer it to his mobile phone or forward the call to another staff member

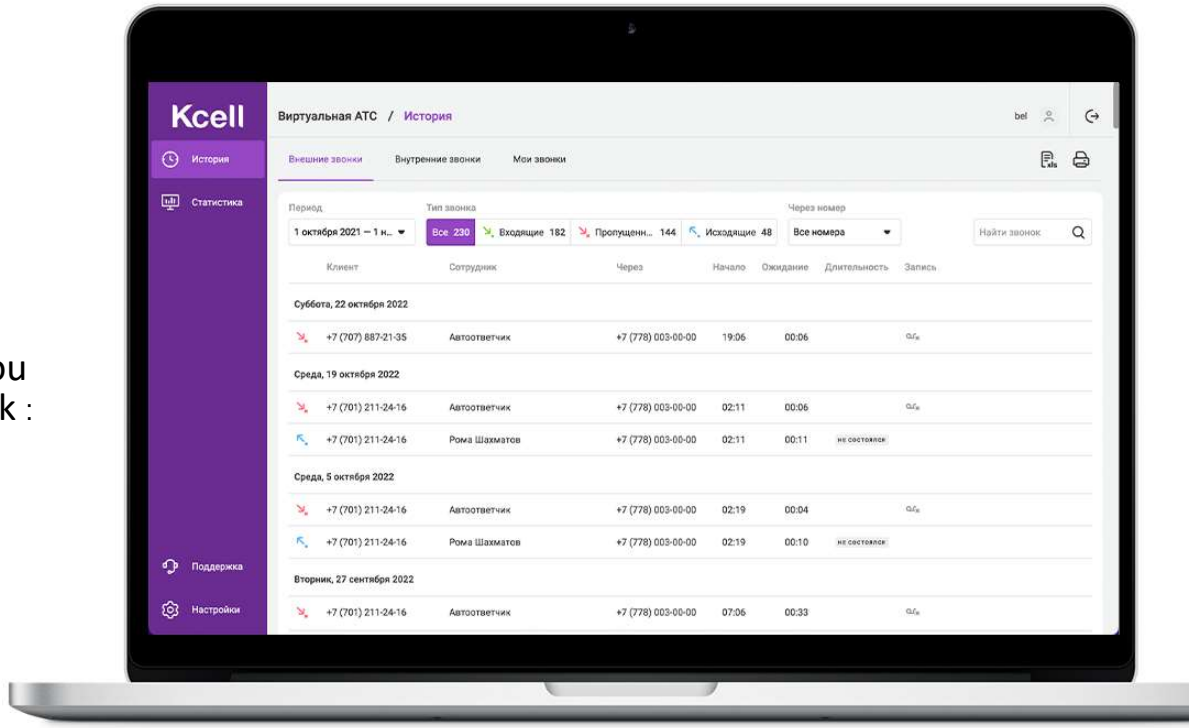

Personal account of the service

How to manage a virtual ATS

Manage and configure call handling scenarios from your customers.It is carried out in a simple and intuitive Personal Account of the Virtual ATS service.

For successful and quick setup of the cabinet, you can always use the convenient manual at the link : https://manual.kcell.kz/

1 Internet access

2 Login and password

Recording and storing calls

Unlimited recording of external and internal calls with the ability to listen in the web interface or mobile application. You can immediately send a recording of any call to a colleague in a messenger.

Choose : will you record all calls, including from mobile phones, or only calls made over the Internet.

Reduce communication costs

Eliminate the abuse of corporate telephony for personal purposes during working hours!

Compliance with legal requirements

For clients of some areas, for example, the financial sector, recording is a requirement of the law.

Advantage in disputes

Resolve conflicts and disputable situations in private by providing your opponent with a recording of a telephone conversation.

Train employees with live examples

The most visual material in the training of a telephone sales employee is recorded examples of telephone conversations (best practice).

Improve the service that your company provides

Wiretapping allows you to eliminate rudeness and incompetence on the part of both employees and clients. Increased staff discipline and quality of customer service.

Kcell Virtual ATS Mobile App

Information about the company's work is always at hand. At any time you will be able to see a summary of the company's work, listen to any conversation and change the VATS settings directly in your smartphone.

Manage settings and telephony via your smartphone screen

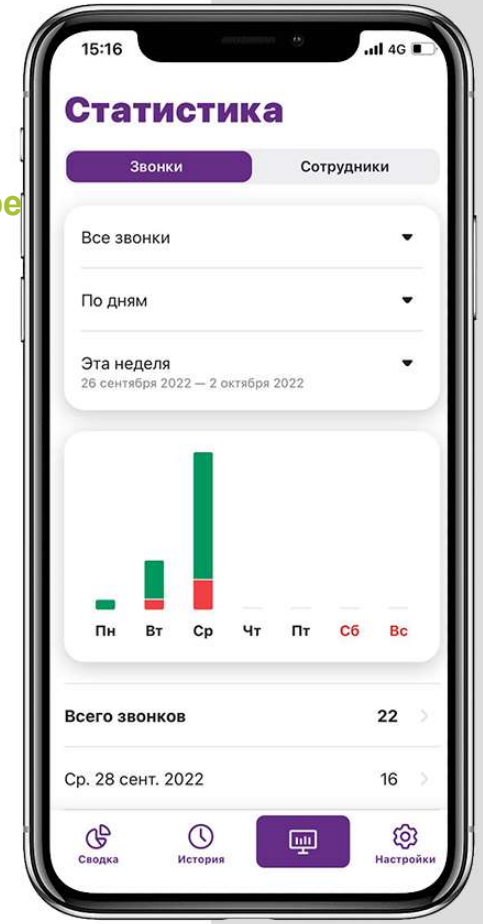

Manage changes based on statistical data

Change your business telephony settings with a few taps of your smartphone screen

Have Virtual ATS information and use options

Download on the App Store

GET IT ON Google Play

Integration with CRM

Easily and simply

Automate the work of your employees, simplify control and allow your CRM to work 100% in integration with Virtual ATS.

Customize the integration yourself by using a widget in the interface or REST API

- Incoming call displays a client card
- When a call is made, the client card is created automatically
- Ability to view the history of interaction with the client for any period
- Transfer the call to the responsible manager

Official integration with market leaders CRM - systems

amoCRM. Битрикс24 yclients

- Available more than 30 CRM for integration, specialized for your business
- The list of CRM available for integration is constantly expanding
- Possibility of integration with your CRM system

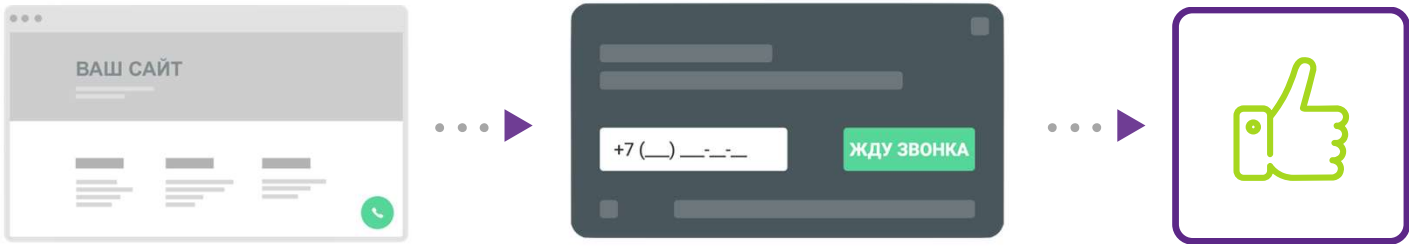

Callback widget from the site

Generator of non-random sales on your website

Get more customers with the callback widget.

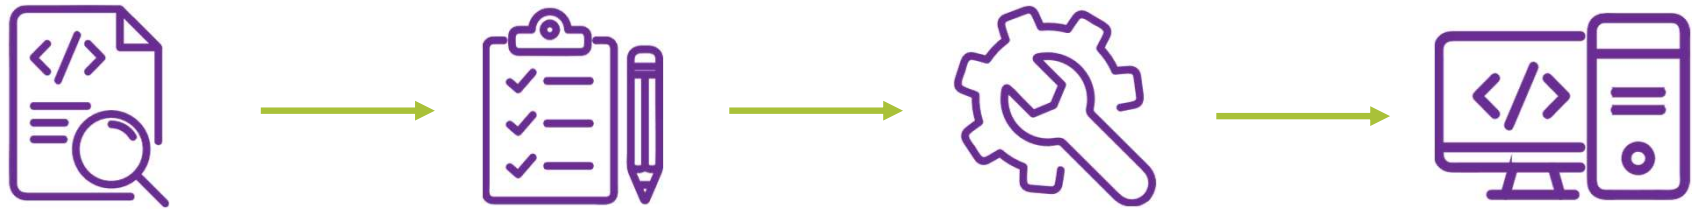

The site visitor will be able to leave a contact number, and we will automatically connect him to the manager or send a callback request to your email address :

- Select where the widget will be located on the page.
- Decide how the widget will work: immediately call the employee, the department or send requests to your email address to call back at a convenient time.
- The employee will call the client from the number specified in the section Settings / More / Outgoing Numbers.
- No additional settings are required. Turn on the "Lead Catcher" function to collect more applications.If the customer orders a callback after business hours.
- You won't lose it anyway. After ordering a callback from the website, the widget will inform the client that your employees will contact him during business hours.

The Auto-call module?

If a company needs to tell its customers about a new promotion, change of service conditions or other important event, it is not necessary to spend precious working hours of managers on it. Record a file with a message, upload a list of numbers to be called and launch the "AutoCall" service - Virtual PBX will call each client from the list and play your announcement while managers are busy with more important things.
You can run multiple autocall jobs at once and prioritise them.
Don't disturb your customers at inappropriate times.
Time zone accounting and time intervals are supported.

Upload a file that virtual PBX will voice to clients

Upload the list of customers to be informed

Perform schedule settings and set dialing rules

Switch on the awareness and observe the result

A detailed description of the functionality and instructions for setting up autodialing can be found in the article: https://manual.kcell.kz/autoinforming

Kcell

Assessment of the quality of service

Your customers will be able to evaluate the quality of service after the call of your operator or manager, thus you can quickly receive feedback on the quality of conversations and improve the quality of conversations of your employees.

Queue number

Your customers will always be informed which ones are in the queue if you have a high call flow every day. Virtual PBX asks you to rate the call quality from 1 to 5. By pressing the corresponding button the client evaluates the quality of service. The client's service evaluation will be saved in the PC and displayed in the "History" section.

Online Listening and Sufflation

Your customers will always receive quality advice, regardless of the experience of the operator/manager, thanks to the "souffle" function. The head of the sales department can always join the conversation in real time and advise the new operator/manager, thus improving the quality of service.

Conference rooms

A module that allows you to create a space in your Personal Office to organise meetings and gatherings in audio format for you and your clients.
